CAREER OBJECTIVE

To join a collaborative development team as an entry-level Web Developer, where I can apply my background in programming and databases to create practical, high-quality web solutions. I am committed to continuous learning, sharpening my problem-solving skills, and delivering work that meets the needs of users and the organization.

WORK EXPERIENCE

Part-Time Office Assistant / AutoCAD Drafter • Project-Based — 2025 – Present

- Organized and maintained company files, documents, and receipts for easy retrieval and record-keeping.
- Prepared technical drawings, floor layouts, and schematics using AutoCAD.

EDUCATION

Bachelor of Science in Computer Engineering — Expected Graduation: 2027
University of Rizal System – Antipolo Campus

Accountancy, Business and Management (ABM) — 2021 – 2023
Sumulong College of Arts and Sciences – Antipolo City

TECHNICAL SKILLS

Languages & Web Tools:
JavaScript, HTML5, CSS3, C++, Python, React.js, Node.js, Tailwind CSS

Design & CAD Tools:
AutoCAD (2D & 3D Drafting), SketchUp (3D Spatial Modeling)

Platforms & Databases:
GitHub, MySQL, PostgreSQL, Firebase

Core Competencies:
Front-End Development, Project Management, API Integration, Real-Time Systems, UI/UX Wireframing

AI & Dev Tools:
AI-Assisted Coding, Prompt Writing, AI-Assisted Debugging, AI-Assisted Research

PROJECT EXPERIENCE

URStamp: Event Management & QR Attendance System — 1ST PLACE AWARD

React.js • TypeScript • Tailwind CSS • Cloudflare Workers • D1 (SQLite) • Drizzle ORM

Developed a centralized university event platform integrating department and program-based audiences, encrypted QR time-in/time-out scanning, and creator-only attendance reporting with PDF export, plus master-list management linking student records to registered accounts.

Microcontroller Cocktail Vending Machine – Thesis Project

HARDWARE & IOT

`Arduino UNO • Raspberry Pi • Touchscreen • Coin Acceptor • Python • AutoCAD`

Designed and built an automated cocktail dispensing machine controlled by microcontrollers, allowing users to select a drink and receive a precisely mixed cocktail without manual preparation. Integrated pumps, valves, sensors, and an interactive UI with CAD structural drafting.

JA1 Antipolo Church Management System

FULL STACK WEB

`HTML5 • CSS3 • JavaScript • Firebase`

Developed a church website and administrative portal featuring role-based Admin/Leader login, an interactive event calendar with calendar export, online member registration, ministry pages, and an integrated AI chatbot assistant for visitor inquiries.

Mang Inasal Self-Ordering Kiosk System

DESKTOP APPLICATION

`VB.Net • Desktop UI • Database Backend`

Developed a self-service ordering kiosk enabling customers to browse the menu, customize meal orders, and place orders independently, with an administrative back-office interface for item and queue management.

Wooden Bizarre Management System

ENTERPRISE WEB APP

`React.js • PostgreSQL • REST APIs`

Engineered a comprehensive business operations platform for order tracking, inventory records, employee attendance, and administrative oversight.

ACADEMIC ACHIEVEMENTS & AWARDS

System Making 1st Place – URStamp (University of Rizal System, 2026)
